UNIVERSITY

COLLEGE OF ENGINEERING & SCIENCE

September 12, 2003

Dr. Ben Choi
Computer Engineering/Computer Science Program
College of Engineering & Science

Dear Ben,

I was very pleased to see your participation in the Workshop on Effective Teaching conducted by Richard Felder and Rebecca Brent on September 4 - 5, 2003. Your participation in that workshop reflects very positively on your interests in improving teaching effectiveness. That attribute is something that is highly valued at Louisiana Tech.

I hope that you found several things that you can use to assist your in enhancing the teaching/learning process - I did. I encourage you to begin to apply one or two things that you learned right away. Then keep your workshop handbook in a convenient location and pull it out frequently for refreshing. I believe that you will find the results to be positive for both you and your students.

This workshop came at a time when you had many other things to do. Thank you for making the enhancement of teaching effectiveness a priority in your schedule.

Sincerely,

Leslie K. Guice, P.E.
Jack Thigpen, Professor
Dean, College of Engineering & Science
